Cleaning products

Health and medical industry

Controlling nosocomial infections is a major concern in the health area, hence cleaning and disinfecting procedures are highly important for the reduction of pathogen spread risks, such as virus, vegetative bacteria, fungi, spores and mycobacteria. Florex offers an innovative line of solutions thru specialized cleaning products to ensure the reduction and control of hospital-acquired infections. In addition, Florex also offers a wide range of high, intermediate and low level disinfecting products designed for the disinfection of critical, semi-critical and non-critical materials.
