## **Industrial laundries**

Florex offers a full range of products and dispensing equipment for optimum garment industrial cleaning (hotels, clinics, hospitals, nursing homes, clubs and common laundries, among others). Among these, and to meet and supply our costumers' specific needs, we offer stain removers, detergents and softeners, as well as advisory and technical maintenance of your equipment.

# Detergreen detergent

Detergent designed to remove and suspend filth during washing. Based on high-efficiency surfactants, this low-alkalinity product does not spoil fabric, as it has greater capacity to penetrate and moisturize textile fibers while preserving colors and quality.

Presentation	Code
60 L	12031
18.9 L	1203

Presentation	Code
60 L	13031
18.9 L	13032

# Detergreen Ultra

Highly concentrated industrial detergent. Low dosing required. It contains agents that remove filth and keep it from sticking to clothing, while polishing yellowed clothes.

Presentation	Code
30 L	120401

## Perox 35

Hydrogen peroxide-based whitener, with bactericidal properties, used on industrial and hotel fabrics, without spoiling color. For use on cotton, polyester, rayon, and “docoma” fabric and can be used on linen as well as color fabric without spoiling color.

Presentation	Code
60 L	12030101
18.9 L	120301

## Alk Laundry

Product designed to improve water alkalinity in industrial washing processes, softening hard water and therefore maximizing detergent performance and avoiding iron residue (rust) that could stain clothes.

Presentation	Code
Estación	1303015
60 L	13030101
18.9 L	130301

## Alk Laundry Ultra

This highly concentrated alkaline product has water softener agents and detergent efficiency enhancers. Its alkalinity allows it to eliminate particular kinds of filth (dirt, mud, etc.) and its efficacy is not affected by washing temperature.

Presentation	Code
60 L	120501
18.9 L	1205

## Industrial fabric softener

The fabric softener is an additive used in industrial fabric washing to give clothes a soft texture and a pleasant aroma. It contains polymers and quaternary ammonium esters that enhance contact with fabric.

Presentation	Code
60 L	130501
18.9 L	13051

## Ultra industrial fabric softener

This highly concentrated product softens fabric, reduces wrinkles, leaves clothes smelling fresh and helps reduce static in synthetic clothes.

Presentation	Code
18.9 L	12012
3.78 L	1201

## Laundry whitener

Color and white fabric whitener and stain remover. It is made with hydrogen peroxide, surfactants and optical brighteners. Restores fabric, enhances color and eliminates deodorant, sunscreen, ketchup stains and the like.

Presentation	Code
60 L	1210313
18.9 L	1210312

## Eco AP-L

Eco AP-L is a non-chlorinated hydrogen peroxide-based and peracetic acid-based whitener for use on color, white, synthetic and cotton fabric. This product is used to eliminate filth caused by tannins as well as tough wine, coffee, tea and other similar stains.

Presentation	Code
18.9 L	102105L
3.78 L	102106L

## Oxamin-L

Oxamin-L is a chlorinated whitener with surfactants used for rinsing white cotton and synthetic clothes. This product is used to eliminate filth caused by tannins as well as tough food, mold and blood stains.

Presentation	Code
950 ml	120001

## Stain Killer 1

Stain Killer 1 is a solvent-based stain-remover. It is mainly use to remove the following types of stains: 1. Hydrophobic substances: Grease, oil, wax. 2. Greasy food. 3. Soot, shoe polish. 4. Beauty products: lipstick, foundation, repellent.

## SK02

SK 02 is a stain-remover designed to eliminate rust stains. It is easy to apply and does not require rinsing, achieving immediate results.

Presentation	Code
120 ml	120004L

Presentation	Code
950 ml	120003

## SK03

SK03 is a new enzymatic stain-remover. Enzymes are biological compounds that break down stains. The product's enzymatic complex eliminates the following stains: 1. Protein and starch. Blood, milk, eggs and sauces. 2. Food grease, ketchup, dressings, mustard. 3. Body fluids like blood and semen. 4. Mold. The product is applied by spraying on the stained area.

Presentation	Code
60 L	128021WL
18.9 L	128020WL

## Whitex L

Whitex-L is an excellent sanitizer, bleacher and deodorizer for industrial laundering use. Avoid use in color fabrics.

# *florex*

We provide advisory services for specific needs along with high-level professionals and specialized equipment: dispensers, dosers and application systems.
